Inspection Live Session

刘琴 *Zin Liu*

Test Engineering Foundation

Essential Knowledge for Test Professionals

Inspection of Omninet MRD

Session 2:

Review the Resolution ! &
Approve ?

Summary 2025

- The findings from the groups are 105 in total.
- Of the 14 findings,
 - Reviewing Accepted Comments
 - Reviewing 77 Accepted in Principle/rejected Comments (be discussed in the class)
 - Confirming “A revised marketing requirement document V0.4”.
 - Closure: Approval.

Pay attention for Review Bugs

1. Nominalization

“ In case of a system crash, a restart of the system shall be performed”

2. Nouns without reference index

“The system shall display the billing data to the registered user on the terminal she is logged in to”?

3. Universal quantifiers

“The system shall show all data sets in every submenu”

Pay attention for Review Bugs

4. Incompletely specified conditions

“The restaurant system shall offer all beverages to a registered guest over the age of 20 years”

Should be revised as :

“All alcohol-free beverages to any registered user younger than 21 years” and “All beverages including all alcoholic beverages to any user over the age of 20” .

☐ If... then, else ☐ In case, ☐ Whether, ☐ depending on,

“If uploaded purchasing information is correct, then system updates the customer credit and shows the final credit amount on screen. “

Else, system displays the dialogue of error referring predefined error code.

Pay attention for Review Bugs

5. Incompletely specified process verbs

“The data needs to be transmitted”

“ To log a user in, the login data is entered”

Inspection live session

Inspection: a trained moderator (other than the author) leads the inspection team (with defined roles) through a formal inspection process (rules, checklists, entry and exit criteria), which includes gathering defect removal metrics

- ❖ ***Moderator: Lead the review meetings***
- ❖ ***Scribe or secretary: Gather information on findings***
- ❖ ***Author: Describe, explain, answer questions on item***
- Reviewer/inspector: Find defects (bugs) in item***
- ❖ ***Manager: Plan, arrange resources and training, support, analyze process metrics***

Role play

- 1. Moderator + Manager – Lecturer***
- 2. Scribe or secretary: by AI***
- 3. Author: – Lecturer***
- 4. Reviewer/inspector: All groups***

45 min+

Check list, Entry and Exit Criteria

- ✚ ***Ambiguities: What exactly does that mean?***
- ✚ ***Incompleteness: Okay, and then what?***
- ✚ ***Usability:***
- ✚ ***Maintainability:***
- ✚ ***Untestability: How can I check this item?***
- ✚ ***Excessive dependencies, coupling and complexity***

Entry Criteria:

Every participants are familiar with the reviewed documents;

A live session (face to face), i.e., all participants (ideally all stakeholders, in particular those from client and customer sides) are available.

A copy of documentations is available for every participants with each line numbered.

Review template (with bug priorities) are prepared

Exit Criteria:

- 1. 100% completeness of the document.***
- 2. All server bugs (high risky bugs) are fixed in the meeting.***
- 3. 100% detected bugs are fixed within 2 days, submit and approved by all participants.***
- 4. The approved version needs to be uploaded to the canvas, and all participants need to be aware of it.***
